

POLYETHYLENE PIPE

MDPE

DESCRIPTION

- MDPE Black Effluent Pipe designed for effluent & sewage discharge applications

CONSTRUCTION/FEATURES

- MDPE (medium density polyethylene)
- Standard sizes: 32mm, 40mm, 50mm, 63mm, 75mm, 90mm, 110mm
- Standard pressure ratings 6.3 Bar and 8 Bar
- Standard coil lengths: 25m, 50m, 100m
- Saves installation time on long discharge pipelines
- Less pipe joints - therefore eliminates likelihood of leaking pipework

APPLICATIONS

- Effluent/Sewage Pumping Stations
- Stormwater Pumping Stations
- Irrigation/Plumbing Systems
- Industrial Slurries
- General Water Reticulation

NB: We do not recommend using blue MDPE pipe for effluent and sewage applications, as blue pipe is normally the designated colour for potable water supply pipe.
